Smiles. Light pink.....	* 1 15
White Finch. White.....	* 1 25

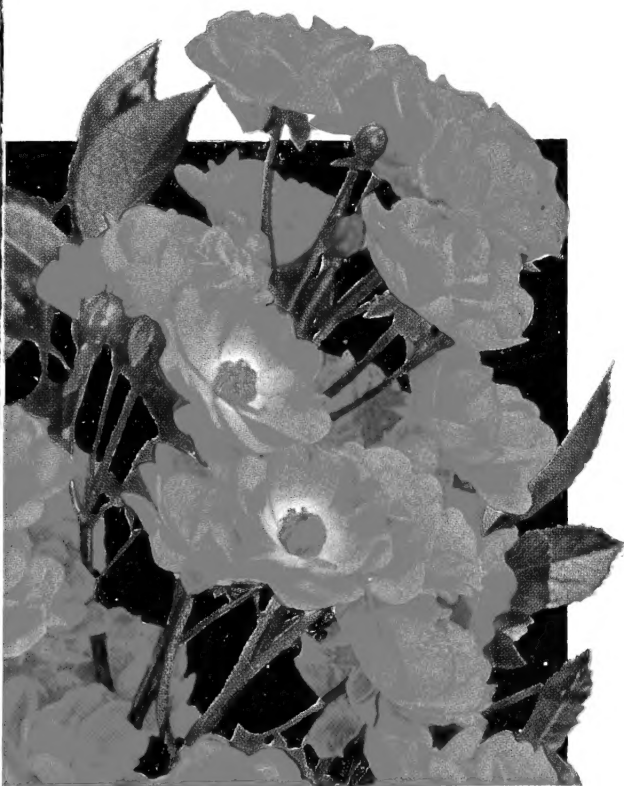

*Patented varieties

Floribunda and Polyantha Roses are becoming more and more popular as their merits become known. They are extremely bushy, vigorous growers and are literally covered with bloom for a large part of the summer. For this reason they make fine outdoor plantings in the form of hedges and borders. Their flowers may be cut repeatedly without harming the display. Try some for yourself.

VICTORY DOZEN
 Order Early and Plant This Fall
 for Bloom Next Season
MELVIN E. WYANT
 Rose Specialist, Inc. MENTOR, OHIO

Through the long years of war, the Rose has continued to hold its popularity. Indeed, it seems even more firmly established as the Queen of Flowers, for it has proved to be a real inspiration and source of strength in time of trouble.

Roses have been in such demand for the past several seasons that stock has become low. Some of our stand-bys are sold out, but we are nevertheless able to offer in this folder a fine list of varieties covering a good range of color. Undoubtedly some of these will be sold out before long. So our advice is to *order immediately* if you want to be sure of getting the varieties you order.

Fall planting gives the bushes a chance to take hold before cold weather and to make an early start in the spring. Follow the directions sent with each order and you will have Roses at their best.

The 12 Roses illustrated here—Wyant's Victory Dozen—make a splendid collection for any garden. The plants have been carefully and properly handled, and represent the very best quality.

The **12** for **\$15.35**
 (Value \$17.25) **Postpaid**

In shipping, the roots are packed in moist moss so that they reach you in the prime of condition.

WYANT ROSES *Produce Satisfaction*

WYANT ROSES are of the highest quality and are all two-year field-grown budded bushes. Having been raised in the severe climate of Northern Ohio by Rose Specialists, they will produce satisfaction in your garden if given a chance.

PLANTING INSTRUCTIONS

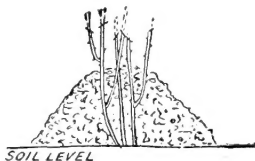

Keep the roots moist all the time before planting.

Spread out the roots so they do not crowd, and tramp the earth firmly about them.

Don't plant too deep.

Plant in good soil where there is sunshine at least half a day.

Mound soil 6 to 10 inches *immediately* after planting, to keep the moisture in the branches.

Roses banked with earth
immediately after
planting.

Fall-Planted Roses are Best

Leading rosarians now agree that fall is the ideal time to plant Roses. Wintering in the ground is Nature's way and results in earlier and larger blooms and more of them. Then, too, the soil is more mellow and easier to work. You can prepare it when convenient and let lay till plants arrive. Our Roses are dug when the season's growth has been completed and they are shipped to you at the proper time—October or November.

ORDER EARLY.—We fill orders in rotation in which received. If sold out of variety ordered, unless you specify otherwise, we will substitute a Rose as near like it as possible. We have many other varieties of Roses which we do not list because of insufficient quantities.

Prevent Black-Spot Next Year Spray Rose-Beds This Fall

Black-spot lives over winter on diseased leaves that fell to the ground this summer. Help prevent the spread of the disease next spring by disinfecting the soil in and around the Rose-bed. Spray the plants, the ground and the surroundings with Lime-sulphur at the rate of 1 pound to 4 gallons of water. Apply it with a sprayer or a sprinkling can the last thing in the fall; it is also well to repeat this treatment the first thing in the spring.

1-lb. can 40c, postpaid. 8-lb. bag \$1.25, Express Collect
